# ICD-10 Medical Coding: Preparation and Instruction for Implementation

This nationally recognized ICD-10 Medical Coding online certificate training course covers the recently upgraded diagnostic and procedural medical coding system. It will soon be mandated by the Federal government for use in the healthcare industry in insurance processing, reimbursement, and statistical data gathering. This online medical coding program will teach you how to prepare for and implement the massive changes to the existing coding system. This new program will present a comprehensive overview of the changes in store for both diagnostic and procedural medical coding along with detailed information on the impacts of the medical coding changes to coders, healthcare staff, physicians, software systems, documentation, and information technology. Textbook included. This online program is offered in partnership with major Colleges and Universities.

## Course Overview

This program includes:

- Comprehensive overview of the objectives, edits, and changes within the soon-to-be released International Classification of Diseases, 10th edition (ICD-10).
- Methodology and Template for planning HIM and non-HIM staff, physician, and allied health personnel education.
- Explanation of requirements for upgrading existing software applications, including claims editors, billing and claims, and electronic data interchange clearinghouses.
- Explanation of how to prepare and develop policy and procedure manual changes, staff training needs, and requirements.

## Course Objectives

Upon successful completion of this program, you will be able to:

- Describe the four major objectives that guided the development of ICD-10-PCS.
- Compare structural changes to coding, terminology, and functionality between ICD-10 and ICD-9.
- Develop skills required for new and existing coders to properly analyze and correctly code diagnoses and procedures using the new ICD-10-CM and ICD-10-PCS.
- Recognize the impacts of ICD-10 to policies and procedures, processes, software, billing, and coding.
- Develop plan for addressing the impacts of ICD-10 and preparing for the changes, including staff training needs.
- Develop references to enable users to stay current on publication changes and delivery.
- Identify strategies for training personnel on the delivered changes, including:
  - Coding/Billing
  - Quality Assurance
  - Utilization Review
  - Compliance Staff
  - Information Systems
  - Outside Vendors
- Prepare plan for Process, Policy, and Procedural re-engineering and documentation.

## How our online courses work

- **Begin when you wish.**
- **You are assigned an instructor for one-on-one assistance.**
- **Move at your own pace.**
- **Your work is evaluated, and a 70% proficiency is required for a certificate.**
- **You should complete the course within 180 days, but you may request an additional 180-day extension.**
- **You will receive a certificate from Aiken Technical College upon successful completion of the course.**

The courses are self-paced. Mentors respond to you, rather than the reverse. Each course has a set of lessons and exams.

Detailed outlines, demos and ratings are available at [www.gatlineducation.com](http://www.gatlineducation.com).
